### Plan/Accounting of how these funds will be spent:

Description	Budget	Explanation
Dredging of Shem Creek		
Engineering Design, Soil Testing, Construction Programming and Permitting	\$125,000.00	
Construction Cost - Thin Layer Placement, Sediment Control, and Stabilization	\$750,000.00	
Monitoring, Measuring and Mitigating	\$50,000.00	
Contingency	\$75,000.00	
Grand Total	\$1,000,000.00	

### Please explain how these funds will be used to provide a public benefit:

Over the past 20 years, the Town has invested heavily in Shem Creek by constructing facilities to increase public access to the Creek, making real estate investments to help preserve and support the shrimping fleet, and by partnering with Army Corps of Engineers to dredge the Creek to maintain navigation channels and dock access. It has been a decade since the last dredging was completed and portions of the creek have silted in. To ensure unimpeded access to the public docks as well as the working shrimp docks, the Town is requesting funding for dredging to restore water depths to eight to ten feet. This project would ensure continued viability of the creek with public access and economic support of the shrimping and fishing fleet and will support efforts to preserve and protect the natural vegetation and wildlife that are a significant attraction to this unique area, adding value to tourism and local commerce.
